Objective

Skilled and creative WordPress Developer and Frontend Web Developer with over 3 years of experience in designing, developing, and maintaining websites. Proficient in HTML, CSS, JavaScript, PHP, and popular frontend frameworks. Adept at creating responsive, user-friendly interfaces and optimizing website performance. Passionate about leveraging modern web technologies to deliver innovative and effective web solutions.

Experience

- **Bunches (New York, United States)**   October 2023 - Current
  Frontend Developer
  • Collaborated fully with cross-functional teams, including designers, project managers, and quality assurance engineers, to gather requirements, plan project milestones, and input suggestions and ideas, thereby increasing software delivery rate by 30%

  • Conducted code review, identified performance bottlenecks, and implemented migration of codebase using context-API, to Redux, which increased user's data access speed.

  • Implemented performance optimization using Realtime updates, allowing group messages, complete emoji reactions, direct responses to messages in group chat, and keyboard shortcuts, which increased the user's flexibility and advanced the software in its goal.

- **ABC Digital Agency (Los Angeles, California)**   August 2021 - June 2022
  Junior WordPress Developer
  Designed and developed custom WordPress themes using PHP, HTML, CSS, and JavaScript.
  Created and customized plugins to extend WordPress functionality.
  Managed website migrations, ensuring data integrity and minimal downtime.
  Collaborated with clients to gather requirements and deliver tailored web solutions.
